SUMMARY

Information Engineering graduate from Universitas Gadjah Mada (GPA 3.26/4.0) with hands-on experience building and operating data pipelines across Apache Airflow, BigQuery, Alibaba Cloud, Kafka, and Spark. Skilled in Python, SQL, distributed processing, cloud data platforms, and end-to-end delivery of reliable, analytics-ready datasets.

PROFESSIONAL EXPERIENCE

DANA (PT Espay Debit Indonesia Koe)

Jun 2026 – Present

Data Engineer Platform Intern

- Cataloged 650+ legacy DAGs from Alibaba Cloud DataWorks, documenting delta, staging, full-scale, and partitioned load patterns to distribute migration ownership across the Data Engineering team.
- Migrating 38 table and DAG workloads from Apache Airflow 2 to Airflow 3 while maintaining orchestration compatibility and data reliability.
- Resolved 20+ data synchronization and backfill tickets by coordinating requirements and dependencies with Backend, Risk, and other teams.
- Processed and validated data for delivery to Google BigQuery and offline tables, enabling downstream reporting and reuse across business divisions.

PT PLN (Persero) – Head Office (Blok M)

Jan 2025 – Feb 2025

Data Engineer Intern

- Built an Apache Kafka-based distributed messaging system for reliable internal server communication.
- Designed a scalable producer-consumer architecture and optimized data flow across enterprise pipelines.

PROJECT EXPERIENCE

Senior Data Engineer Project – Crypto Data Platform

Mar 2026

Data Engineer

- Built an end-to-end Medallion Architecture (Bronze, Silver, Gold) using Apache Airflow for orchestration.
- Implemented Apache Kafka with 3 partitions for real-time ingestion and Apache Spark for distributed processing.
- Reduced storage usage by 80% using Parquet on MinIO; managed data quality with dbt and visualized results in Grafana.
- Deployed via Docker Compose with NGINX as a Reverse Proxy/API Gateway and Telegram Bot for alerting.
- GitHub: github.com/Rendyuiop/crypto-data-platform | Demo: bit.ly/video-demo-data-engineer

Smart Inverter for Energy Management

Nov 2025

Fullstack & AI Developer

- Developed an end-to-end IoT system using STM32 and ESP modules for real-time energy monitoring and cloud-integrated control.
- Architected WiFi-based data transmission between multiple nodes and a web-based monitoring dashboard.
- Integrated Machine Learning logic on embedded systems to analyze power usage patterns and automate load prioritization.
- Website: capstone-asli-rendyuiops-projects.vercel.app

KKN-PPM UGM Pangandaran – Desa Karangjaladri — Web Developer

Jul 2025

- Developed and deployed the official village and mangrove ecosystem website to enhance public transparency and environmental awareness.
- Architected a data-driven website structure and collaborated with local stakeholders to gather functional requirements.
- Website: karangjaladri.desa.id | GitHub: github.com/Rendyuiop/mangrove-kj

Senior Project – LokerHub

May 2025

AI Engineer / Data Science

- Developed an NLP model that classified resumes into 25 job categories using Multinomial Naive Bayes.
- Built an end-to-end Machine Learning pipeline, including text preprocessing (Regex, Tokenization), TF-IDF Vectorization, and PDF parsing.
- Trained and evaluated the model on 2,400+ resume samples to enable real-time category prediction and backend integration.
- GitHub: github.com/mfachrizalg/LokerHub

Junior Project – Foodle

Aug 2024

Software Architect

- Designed the system architecture for a food waste management application, focusing on scalability, data consistency, and modular design.
- Integrated complex modules including inventory management, delivery services, and user interaction components.
- Architected a robust backend structure to ensure efficient data flow and system reliability.
- GitHub: github.com/MZidane28/Foodle

Artificial Intelligence Project – Deepfake Audio Detection

Jun 2024

Data Science

- Processed and curated large-scale audio datasets to support high-performance CNN training.
- Engineered robust preprocessing pipelines to enhance model accuracy in detecting manipulated audio.
- Contributed to an AI-driven system specialized in identifying deepfake audio patterns.
- Project Access: bit.ly/deepfake-audio-rendy

EDUCATION

Universitas Gadjah Mada

2022 – 2026

- Bachelor of Engineering in Information Engineering
- GPA 3.26/4.0

- Relevant Coursework: Artificial Intelligence, Data Engineering, Database Technology, Algorithms and Data Structures, Data Analyst, Data Science, Software Engineering, Microprocessor-Based Systems.

ORGANIZATIONAL/EVENT EXPERIENCE

KKN-PPM UGM Pangandaran — PSDM **Jan 2025 – Aug 2025**

- As the People Development (PSDM) staff, I spearheaded participant coordination, fostered team collaboration, and managed professional development activities to ensure a safe and productive event environment.

FindIT 2024 — Logistics **Jan 2024 – Jun 2024**

- Managed end-to-end event logistics, including team coordination, scheduling, and technical setup to ensure seamless execution.

Lustrum DTETI — People Development & Security **Jan 2023 – Nov 2023**

- People Development and Security*
- Spearheaded participant coordination and professional development while managing security protocols to ensure a safe and productive environment.

FindIT 2023 — Liaison Officer Staff **Jan 2023 – Jun 2023**

- LO Staff*
- Acted as the primary communication bridge between competitive programming participants and organizers to resolve inquiries and ensure efficient competition flow.

SKILLS

- Technical Skills: Programming (Python, C/C++, Java), Database (SQL, MongoDB), Data Engineering (Apache Kafka, Spark, Airflow, dbt), AI/ML (NLP, CNN, TensorFlow), Embedded Systems (STM32, ESP32, FreeRTOS), and DevOps (Docker, NGINX, Git).
- Non-Technical Skills: Analytical problem solving, critical thinking, cross-functional teamwork, leadership, and fast decision-making in high-pressure environments.
- Languages: Bahasa Indonesia (Native) and English (Professional Working Proficiency).
